Data Integrity/Data Quality - Identifying the Challenges and
Providing Solutions (Panel discussions)**

As PMPs become more and more utilized in the healthcare settings and their data being used in public health surveillance and planning activities it has become increasingly important that all data is reported and in a timely manner. Because this data is now used in various ways not only does it need to be timely, but it needs to be accurate. These panel discussions will introduce some of the challenges faced by dispensers, PMP system vendors and PMP programs and provide potential to remedy the deficiencies.
