In 2016 the National Association of State Controlled Substances Authorities (NASCSA) published a Model PMP Act (Act). This document was developed through a collaborative approach with several organizations and stakeholders to provide all state and jurisdictional Prescription Monitoring Programs with guidance language to utilize as PMPs mature and evolve.

NASCSA has created a Model PMP Act Task Force which is in the process of reviewing and updating the Act this year. In order to create a comprehensive work which addresses PMP needs now and in the future, we are opening a comment period to interested stakeholders who wish to provide input into the development of the revised Model PMP Act.

The current Model PMP Act is available here for your review. If you would like to provide comments relating to the modification of this document, please send them to Kevin Borcher who is assisting in this project at kborcher@nehii.org by March 31, 2020. The comments will be reviewed by the Task Force for potential inclusion into the revised Act. We appreciate your participation in this process.
